## About This Game

Operation warcade is a shooter specifically designed for virtual reality, inspired by the late '80s classic war arcade that now uses the latest technology to convert it into a unique experience.

### EXPERIENCE THE EMOTION FROM WITHIN

Thanks to the innovative immersion system, you will be able to travel inside the video game whenever you want to experience the adventure in a completely different way, like shooting from a helicopter, from a trench or from inside a tank... because why not? The power is on your side.

**NEW RULES, USE THE ENVIRONMENT!**

Use all the elements in the environment in your favor with the incredible gravity gun. You will be able to capture any object in the landscape and launch it against enemies, converting them into a weapon. Your imagination is the limit.

CLASSIC MODE -FOR THOSE PARTICULARLY NOSTALGIC-

Pass 6 levels and the final boss, like in the old days. The difference is that now you won't have to use coins for retries. What are you waiting for?

**IMMERSIVE MODE -FOR PROFESSIONALS-**

Complete 108 missions, 36 levels and many upgrades will unlock, giving you ever more destructive power. Natural anti-stress guaranteed.

Game Compatible with pp-gun, hyperkin and other controllers with HTC-Tracker

This is a really great game, especially considering it was done by one person. It has some issues with translation but nothing that really disrupts that game. The story kept me guessing too. I can usually figure out where the plot is headed but I couldn't catch on to till the end.. This is a cute little game, but I didn't find it as gripping as the Bejeweled series. \*\*\*. The game starts some time after the first game finished but i am not going to say more because spoilers.

The puzzles are far better and more difficult than the first game and there are a lot of new gameplay aspects to spice them up. A lot of jokes and an explosive finale. Must have if you are a fan of the 1st one.. I really enjoyed this game with its neat craftverse story, branching storyline and well thought out characters. The decisions I made felt well thought out and consequential with the story completely changing depending on actions I took several chapters ago. The game functions as a series of seven self-contained scenarios featuring literature staples like the detective story, the tough negotiation and the rescue mission, all tied together by the overarching theme of balancing the city's needs for water with that of its surroundings. Some earlier reviews have talked about the difficulty of approaching the game without prior knowledge of the craftverse and also the somewhat overstretched nature of the storyline. These faults are not difficult to miss but I think that the game is well worth buying, especially if you enjoyed the earlier deathless games.. UPlay ruined this game for me.. \*\_\* EN for everyone \*\_\*. I played the first game a few years back, thinking it was just some cheap visual novel with a few puzzles, but I was pleasantly surprised by how good both the gameplay and the story was. To me, the soundtrack, voice acting, story, and gameplay was superb, and worth the price of the game.

I must say however, that I was disappointed when I played Unhack 2, and realised that there is no voice acting(I am an idiot because it says on the store page, that voice acting is not present in the game because of the amount of acting required, but I somehow missed that part) and that actual gameplay was too easy and segments were too few and too far apart. Despite these issues, the visual novel part is still great. Story is quite good and surprised me multiple times, the soundtrack is amazing, and I listened to it quite a few times and the art is just as good, if not better than in the first game.

All in all, I like the game. Even if it lacks some of the charm of the first game, I would highly recommend it to anyone who is looking for a good story (though you must play the first game and its DLC first). When (or if) a sequel is released, I will play it, even if it doesn't bring back the gameplay of the first game.

got banned for nothing. worst game ever. you have been kicked from the server  
you have been kicked from the server  
you have been kicked from the server  
you have been kicked from the server. A cute, well-polished game. Takes 1.5-2 hours to complete. Not much content, but the quality is very high. It's a work of art; The type of experience I like to support. There's a demo, so you have no excuse to not try it.

The puzzles are easy. So, not very taxing, but it's fun to watch things play out. The gist of it is this: you move lightbugs around to activate things. The character moves on his own. You just remove the obstructions. It's just fun and a joy to be in this tiny world. It's like a diorama that surrounds you. Because there's stuff behind you, I did have some trouble with tracking (I don't have 3 sensors), but I worked around it by always having a side visible.

I was a little turned off by the baby babble of the main character, but the charm of this world won me over. Also, at first, I didn't realize you need to watch the lightbug to advance to the next level. Great game. Hope to see more.. Overall Score: D+

While a polished presentation, in the end this "puzzle" game is nothing more than a bunch of blind guesses. After you figure out the combos that actually make sense (seeds+field=wheat, etc.) you're stuck with a bunch that are just shots in the dark. Water+glass=ice, because it kinda looks the same, I guess? Apple+cellphone=religion, hyuk, hyuk! And it's not enough to discover all the "elements." You have to discover every possible way to make each element, if you want to 100% this one. It's just tedious and boring.. VERY GREAT GAME I LIKE VODKA AND DRINK THIS GAME TO PLAY WITH GUNS PEW PEW BUY THIS FOR 200000000€ EZ PO♥♥♥♥♥♥I VODKA LADA VODKA SLAV. So far, so good.. It really is a good throwback for people who enjoyed games like Populus or Black&White in the past, and it's definitely worth the \$5.. I do not like to give negative reviews, but I had a few things that bothered me. It was short--but I expected that. It was difficult to tell when the main character was talking at first, which led to some confusion. The story did not interest me at all until about halfway through and, even then, I only was able to muster up a cursory at best interest.

It pains me to put down writing in general, especially of smaller teams, but it was decidedly bland and unengaging.. Fun to play. Glad I bought this.. Weird, dark, slow, horrible AI, annoying background music and etc...

For the developer:

I played only 0.1 hours because it was all the time I could handle playing this thing!

That was just the tutorial? Ok, well, it's the WORST tutorial experience I ever had.

I uninstalled it already and I will never play it again, for sure!. Fun puzzle game. Song during gameplay has the first few notes of the Flintstones so while i'm playing the only thing I can think is "Flintstones, Meet the Flintstones, Meet the Flintstones, Meet the Flintstones, Meet the Flintstones, Meet the Flintstones."

Fun game
