Played this game since I was a kid, it's a great game for me, could be the nostalgia talking but still.

Only bad things I have to point out are :

↳ The weirdly high cost

↳ In the really late game the game may get kinda buggy, it made my character basically useless... so eh. This game is just insane. Insanely good.

First of all, I got this for 20\$. I think it was worth it. You might be like, "Dude, it's 20 bucks. Dood, it's just \$20 worth of fun." Well, you may not have played it. This is from my opinion. And I think it's really fun. Especially the combat zones. Like the lab and the freaking insanely hard new abandoned warehouse. And if you are thinking about roasting me in the comments, don't. Buy this game for yourself and see how good it actually is. I play this game for hours. It's so addicting!!!. 9 bucks max. Fun but short. not worth the price.
