Red Hat opens source for OpenStack in Ceph for its private cloud and at least 75% of the world's largest IT corporations, including the likes of AT&T, Cisco, Comcast, Verizon and Vodafone rely on the enterprise-grade OpenStack platform to provide their hybrid cloud management. Cloud Native Apps: ACI powered by ACI.Net re-architects the OpenStack network to deliver a modern infrastructure for cloud-native applications and services. Azure Kubernetes Service: Azure provides a complete private, public, and hybrid cloud platform for developers and cloud-native workloads.

6 ways to go about training for your first competition Many skaters begin their skater training by taking lessons from a qualified coach for a set number of weeks and months. This can work to a certain degree, but not everybody has the time or money for constant lessons. You can still improve your skating skills in other ways. There are 6 different ways to improve your skating:

1. Stick to a routine Whether you are new to skating or a more experienced skater, when you try to perfect your skating, you should first stick to a routine. A routine is a set sequence of moves. They are usually done in a row and are very short, while you are learning a new skill. When you are a beginner, you should practice new moves by doing them in a routine. This way you can concentrate on how to execute a sequence and get a good rhythm going before making any mistakes. As you get better, try to change your routine and improve on it. The best skaters have a collection of routines that they have been perfecting over the years. A routine is an absolute minimum, you should still have at least five to seven different sequences that you can execute when you have to change the music. This will make it easier for you to learn any new element in the music. If you find a routine that is really difficult to learn, it is time to improvise.
2. Be in the right spot If you are a beginner, you should be in a routine that is not too complicated and also not too easy. As you are improving, you should not only have a good routine, but also have good skills to go with the music. A good way to do this is to learn a new element in the same
